

COLOR STACK

CHALLENGE™

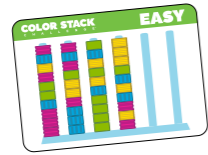

ARE HUE READY FOR AN EPIC COLOR CHALLENGE?

Color Stack is a race to solve the puzzle before your opponent.

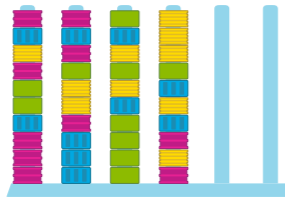

YOUR MISSION: Sort the rings into stacks of the same color as quickly as possible

SETUP

Each player gets a Stack Rack and 40 rings (10 of each color).

Then, draw a card for you and your opponent to solve. Place the rings on the poles according to the image. **Always leave the last two poles empty.**

HOW TO PLAY

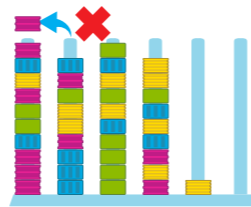

On the count of 3, both players race to organize their Stack Racks by color.

THERE ARE A COUPLE MORE RULES TO FOLLOW:

1. You can only place a ring on top of another ring of the same color OR on an empty pole.

2. If a pole is already filled with 10 rings, it's off-limits, like this pole here.

You'll have to move a ring to an empty pole, or one with fewer rings, before you can add another ring to that pole.

3. The order in which you sort the colors doesn't matter. You might start by sorting blue, while your opponent might sort green first. It's up to you!

ONE MORE THING:

You must start and end with 2 empty poles. The empty poles you start with DO NOT have to be the same empty poles you end with.

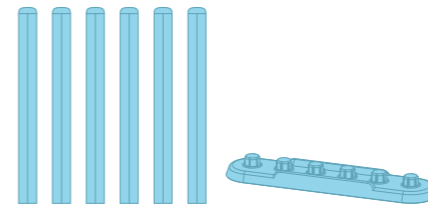

HOW TO WIN

Play until all the colored rings have been sorted onto their poles. Whoever was the first to sort all their colors WINS!

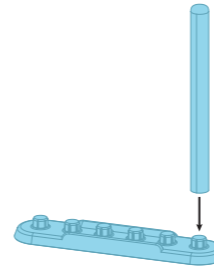

SOLO PLAY

Grab a timer and draw a Challenge Card. Can you beat your best time?
