Soon, you'll be hitting the "court" to compete to be the MVP. Use your launcher to shoot baskets and reach a slam dunk victory by being the first one to score 5 points.

SETUP

First, unfold the court. Isn't it beautiful?
You can practically hear the shoes squeaking.

Place it at an equal distance from both players. You might want to adjust the metal plates slightly by bending them a bit more if you find the shots are off.

Each player receives a basketball and simultaneously places it in their launcher. Now, take a second to get in the zone, as all great athletes do.

- 1** Both players position their basketballs on the launchers.
- 3** Every successful shot into the basket earns one point.

- 2** Using one finger, press down and release the launcher to shoot the basketball.
- 4** Whenever you score, move your point tracker up 1 spot.

HOW TO WIN

Whoever reaches 5 points first wins! Rematch, anyone?
