Let's Get Deep

DATE NIGHT SCRATCH OFF

SETUP

You're gonna get lucky—with a good date, that is. Go ahead and grab a scratch-off date, and let fate take it from here.

BUT... HOW DO WE CHOOSE?

Figure out the day you want to do the date. Each card has some key information that will help you decide.

TIME OF DAY

This box contains dates for both **Day Dates** and **Night Dates**. Pick which one works best for you, then move on to the next indicators.

LENGTH

Use this indicator to see how much time you'll need to dedicate toward the date. Some are pretty fast and can be done as a quickie, and others might take the whole day or evening. Choose whichever fits best in your schedule.

LOCATION

Each card will tell you if the date takes place **at home, indoors, or outside**.

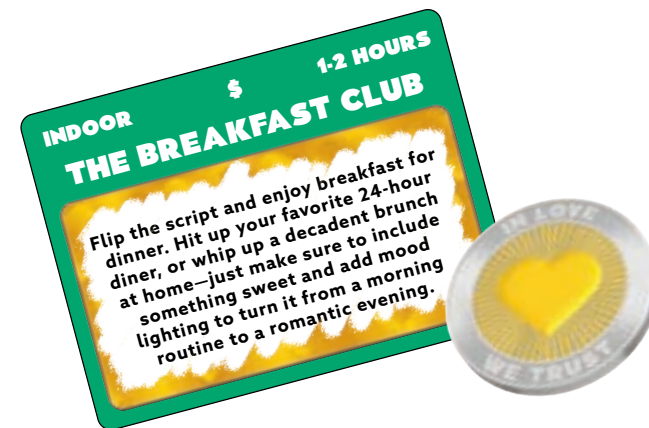

Indoor dates mean you leave the house but are indoors, so you can do them regardless of weather.

At-home dates are the same thing—just in the comfort of your own home.

Outside dates are, well, outside, and generally require good weather to complete.

PRICE

This indicator gives a range for how much each date will cost. Some will be entirely free, and others might be better for a night you want to treat yourselves. Most will be somewhere in between.

And that's it. Go ahead and take that metal token. No matter which one you pull, you're bound to hit the jackpot.
